

# Contents

<b>I</b>	<b>Static Economies</b>	<b>2</b>
<b>1</b>	<b>Arbitrage Pricing</b>	<b>3</b>
1.1	The Setup . . . . .	3
1.2	Arbitrage Opportunities . . . . .	6
1.3	State Pricing under No-Arbitrage . . . . .	8
1.4	Complete vs Incomplete Markets . . . . .	11
1.5	Risk Neutral Probabilities and Stochastic Discount Factors . . . . .	13
1.6	The Fundamental Pricing Equation . . . . .	15
1.7	Basic Derivatives . . . . .	16
1.7.1	Forwards . . . . .	16
1.7.2	Options . . . . .	18
1.7.3	The Binomial Model . . . . .	20
1.7.4	Modigliani-Miller Propositions . . . . .	21
1.8	End of Chapter Summary . . . . .	24
1.9	Exercises . . . . .	25
1.10	Mathematical Appendix . . . . .	27
1.10.1	Systems of linear equations . . . . .	27
1.10.2	Convex sets and their separation . . . . .	27
	References . . . . .	30
<b>2</b>	<b>Single Agent Optimality</b>	<b>31</b>
2.1	The Setup . . . . .	31
2.2	Individual Optimality and Absence of Arbitrage . . . . .	32
2.3	Individual Optimality and Pricing . . . . .	33
2.3.1	Adding consumption at $t = 0$ . . . . .	35
2.3.2	Time-separable expected utility . . . . .	36
2.4	End of Chapter Summary . . . . .	38
2.5	Exercises . . . . .	39
2.6	Mathematical Appendix . . . . .	40
2.6.1	Notation and rules for matrix derivatives . . . . .	40
2.6.2	The consumption-investment problem in matrix notation . . . . .	40
	References . . . . .	43

<b>3</b>	<b>Risk and Optimal Portfolios</b>	<b>44</b>
3.1	Risk . . . . .	44
3.1.1	Greater risk . . . . .	44
3.1.2	Risk and risk aversion . . . . .	45
3.1.3	Greater risk and variance . . . . .	45
3.2	The Setup . . . . .	46
3.3	Optimal Portfolios with One Risky Security . . . . .	48
3.4	Comparative Statics of Optimal Portfolios . . . . .	50
3.4.1	Comparative statics in wealth . . . . .	50
3.4.2	Comparative statics in expected return . . . . .	51
3.4.3	Comparative statics in risk . . . . .	53
3.5	Optimal Portfolios with Multiple Risky Securities . . . . .	54
3.5.1	Risk-Return Trade-off . . . . .	54
3.5.2	Optimal Portfolios Under Fair Pricing . . . . .	55
3.5.3	Risk Premia and Optimal Portfolio . . . . .	56
3.5.4	Optimal Portfolios under Linear Risk Tolerance . . . . .	58
3.5.5	Constant absolute risk aversion and multivariate normal returns . . . . .	59
3.6	End of Chapter Summary . . . . .	62
3.7	Exercises . . . . .	63
3.8	Mathematical Appendix . . . . .	65
3.8.1	Independence, mean independence and uncorrelatedness . . . . .	65
	References . . . . .	67
<b>4</b>	<b>Financial Equilibrium</b>	<b>68</b>
4.1	Equilibrium and Pareto Optimality . . . . .	68
4.2	Equilibrium in Complete Markets . . . . .	69
4.3	The Representative Agent . . . . .	72
4.3.1	The Pricing Equation under Complete Markets . . . . .	76
4.4	Equilibrium Properties under Complete markets . . . . .	78
4.4.1	Properties of the Consumption Allocation . . . . .	78
4.4.2	Pareto Optimal Sharing Rules . . . . .	80
4.4.3	The Aggregation Property . . . . .	82
4.4.4	Monotonicity of the SDF under complete markets . . . . .	84
4.5	Equilibrium in Incomplete Markets . . . . .	85
4.6	End of Chapter Summary . . . . .	88
4.7	Exercises . . . . .	89
<b>5</b>	<b>Mean Variance Analysis</b>	<b>92</b>
5.1	Preliminaries . . . . .	92
5.1.1	Inner Products and Hilbert Spaces . . . . .	92
5.1.2	Orthogonality and Projections . . . . .	93
5.1.3	Orthogonal Projections and Linear Regressions . . . . .	94
5.1.4	The Riesz Kernel . . . . .	95

5.2	Mean Variance Analysis . . . . .	96
5.2.1	The Expectations and Pricing Kernels . . . . .	96
5.2.2	Mean-Variance Frontier Payoffs . . . . .	98
5.2.3	Mean-Variance Frontier Returns . . . . .	99
5.2.4	The Mean-Standard Deviation Frontier . . . . .	101
5.2.5	Mean-Variance Returns and SDF . . . . .	103
5.2.6	Zero Covariance Frontier Returns . . . . .	104
5.2.7	Beta Pricing . . . . .	104
5.3	End of Chapter Summary . . . . .	106
5.4	Exercises . . . . .	107
	References . . . . .	108
<b>6</b>	<b>Asset Pricing Models</b>	<b>109</b>
6.1	Capital Asset Pricing Model (CAPM) . . . . .	109
6.1.1	Quadratic Utilities and Complete Markets . . . . .	110
6.1.2	Quadratic Utilities and Effectively Complete Markets . . . . .	111
6.1.3	Mean-Variance Preferences . . . . .	111
6.2	Factor Pricing . . . . .	115
6.2.1	Arbitrage Pricing Theory . . . . .	116
6.2.2	Factor Pricing Errors and the Pricing Kernel . . . . .	119
6.2.3	Factor Pricing and Stochastic Discount Factors . . . . .	121
6.2.4	Factor Pricing and Mean-Variance Returns . . . . .	123
6.2.5	Mean-Independent Factor Structure . . . . .	124
6.2.6	Options as factors . . . . .	125
6.3	Consumption-Based Asset Pricing . . . . .	127
6.3.1	Consumption Risk and Risk Premia . . . . .	127
6.3.2	Pricing Options . . . . .	130
6.3.3	The consumption-based model in practice . . . . .	131
6.4	End of Chapter Summary . . . . .	133
6.5	Exercises . . . . .	135
	References . . . . .	138
<b>II</b>	<b>Multiperiod Economies</b>	<b>139</b>
<b>7</b>	<b>Arbitrage and Pricing</b>	<b>140</b>
7.1	Preliminaries . . . . .	140
7.2	No Arbitrage, State Prices, and Martingales . . . . .	141
7.2.1	State price density process . . . . .	142
7.2.2	Gain process . . . . .	145
7.2.3	Absence of arbitrage and existence of a state price density process . . . . .	147
7.3	No-Arbitrage and Equivalent Martingale Measures . . . . .	148
7.3.1	Complete Markets . . . . .	153

7.3.2	Multiperiod Valuation of Redundant Securities . . . . .	154
7.4	The Binomial Model . . . . .	155
7.4.1	Option Pricing . . . . .	159
7.4.2	Convergence to B-S . . . . .	161
7.4.3	The Black-Scholes model: no arbitrage . . . . .	161
7.5	End of Chapter Summary . . . . .	164
7.6	Exercises . . . . .	165
7.7	Mathematical Appendix . . . . .	166
7.7.1	Sigma algebras and partitions . . . . .	166
7.7.2	Probability Spaces . . . . .	167
7.7.3	Stochastic Processes . . . . .	167
7.7.4	Conditional Expectations and Martingales . . . . .	168
	References . . . . .	169
<b>8</b>	<b>Individual Optimality and Pricing</b>	<b>170</b>
8.1	The Setup . . . . .	170
8.2	Individual Optimality, Absence of Arbitrage, and Pricing . . . . .	170
8.2.1	Time-Separable Utility . . . . .	171
8.2.2	Habit-Formation Utility . . . . .	172
8.2.3	Recursive Preferences . . . . .	173
8.3	End of Chapter Summary . . . . .	174
8.4	Mathematical Appendix . . . . .	175
8.4.1	Directional Derivative . . . . .	175
	References . . . . .	176
<b>9</b>	<b>Financial Equilibrium</b>	<b>177</b>
9.1	Setup and Equilibrium . . . . .	177
9.2	Complete Markets and Pareto Optimality . . . . .	177
9.3	The Representative Agent . . . . .	179
9.3.1	Expected Utility . . . . .	181
9.4	Consumption-CAPM and Conditional CAPM . . . . .	182
9.4.1	Representative investor . . . . .	183
9.4.2	C-CAPM without a representative investor . . . . .	184
9.5	Exercises . . . . .	186
	References . . . . .	189
<b>10</b>	<b>Some Equilibrium Models</b>	<b>190</b>
10.1	External Habit . . . . .	190
10.2	Rare Disasters . . . . .	192
10.3	Long-Run Risk . . . . .	193
10.4	Incomplete Markets and Heterogeneity . . . . .	194
10.5	Appendix: Linearized Present Value Formula . . . . .	195
	References . . . . .	197
